

Summary Action Report

MTO Site Number: Unknown

Structure ID: K-0021

Structure Name: K-0021 Bridge Condition Index (BCI): 23.7

Road Name: Kemble Rock Road

Location: Lot 40/41, Conc. 20 Inspection Date: 06/12/2024

Structure Type: Double CSP Culvert Inspected By: David Debour, E.I.T.

No. of Spans: 2 Spans Lengths: 2 – 1.2mø

Road Width: 6.5m Overall Structure Width: 2.8m

Year of Construction: Unknown Current Load Limit: N/A

Overall Comments:

Due to the overall size and location of this structure, the culverts have been included in the Municipality's inventory in 2024. The culvert barrels appear to be in overall poor condition with major section loss at inverts, separation at barrel joints and deformations at the obvert noted throughout. Due to the severe deterioration of the culvert inverts, replacement is recommended within 1 year to ensure the performance of the roadway and the safety of the public.

Total Cost:							

Justification:

Replacement of the structure is recommended to ensure the safety of the public. Each barrel of the structure has experienced significant deterioration and section loss reducing the structural adequacy of the structure. We anticipate that deformations within the structures will worsen over time with continued traffic use and further deterioration of the culvert barrels.

If the structure is not replaced before the end of 2024, we recommend that the structure be monitored on a regular basis by a qualified individual until construction can be completed.
