		Completion (end 2023)	Comments
	Overall Completion:	43%	Progress on Strategic Objectives established for the 2019 - 2023 period has been less sunbstantial than was envisage Two significant pressures, unanticipated at the time of development of the Strategic Plan have significantly affected ability to deliver on these objectives; + COVID-19 Pandemic struck Canada in March, 2020 and impacted service delivery substantially until mid 2021 an continued to impact service delivery to a significant degree until early 2022. Resources of the Township had to be redeployed to effectively manage the municipality through this globally impactful event where the focus was on conservice delivery and strategic projects lacked dedicated resources to move them forward. + Since late 2018, the Township has seen significant staff turnover, and has seen ongoing and very high levels of structure values of the second positions vacant for periods significantly impacts the ability of the Township of a little over 40 staff, having a quater of positions vacant for periods significantly impacts the ability of the Township to deliver on Strategic Priorities. Furthet times, there has been significant turn over in management and senior management roles (Managers, Directors and CAO, with nine (9) CAOs (interim, acting and permanent) engaged during this Strategic Plan period. Lack of consister direction and oversight, and a more or less continuous period of on boarding has left little resource available to most strategic projects forward. + Significant legistlative changes, particularly in 2022 and 2023 in the Planning and Environmental areas at a Priovincial level have forced resources to be directed to responding to, interpreting and changing process to meet no requirements. These changes continue to be impactful and should be recognised as the largest and most substantive changes to these areas of legistlation in a generation.
